

SEO Performance Report

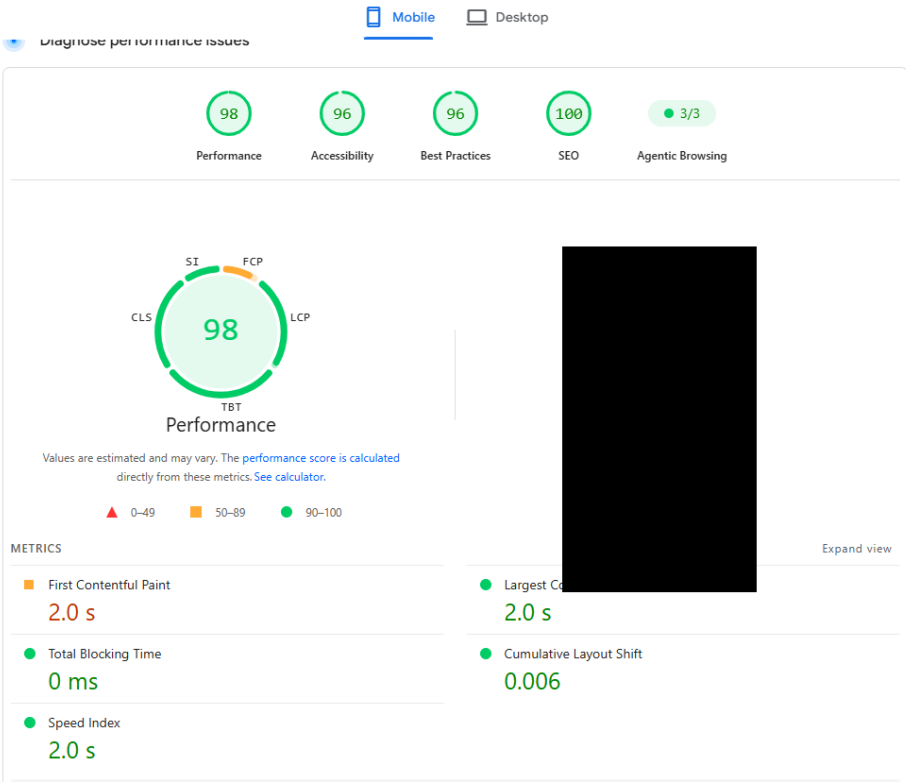

September 2026 · Monthly SEO — e-commerce client

SAMPLE REPORT — This is a real monthly client report. The client's name, domain and private document links have been redacted.

Work completed this month

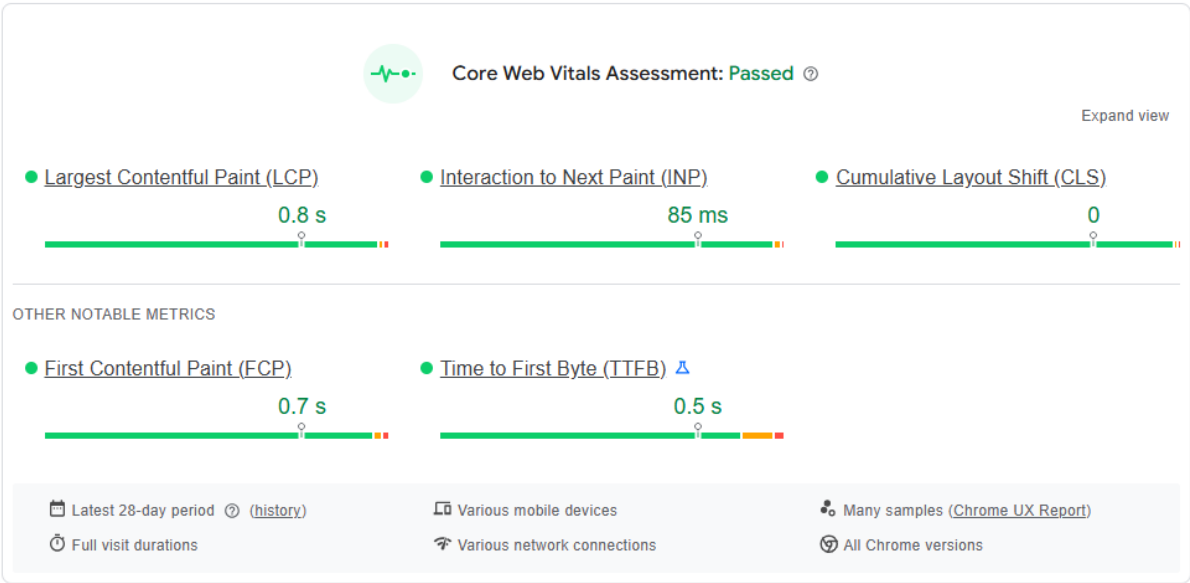

- Marked the meta tags as **noindex** so thin pages won't be indexed going forward. Removed pages tracked in an internal sheet *[link removed]*.
- Optimized **robots.txt** to improve AI crawler access and market-based crawling.
- Regenerated **sitemap.xml** with market-based URLs, set it to auto-include new URLs, and submitted it to Google Search Console.
- Added **hreflang tags with canonical URLs** to every product across all markets. *[code screenshot — URLs redacted]*
- Continued improving existing content for freshness and topical relevance; identified content gaps and readability improvements.
- Worked on **site speed, accessibility and overall performance**; fixed Core Web Vitals.
- Reviewed featured-snippet and rich-result opportunities; optimized selected sections with clear headings and direct answers.
- Audited and improved **internal linking** to strengthen site architecture and help search engines discover important content.
- Monitored the backlink profile and off-page signals; reviewed new backlinks and watched for suspicious or low-quality links.
- Evaluated local search performance and location-based keyword opportunities; tracked competitor activity and search trends.
- Tracked keyword movements, organic traffic trends and overall search visibility through the month.
- Created **10 Web 2.0 backlinks** for target keywords. *[URLs removed]*
- Keyword research: identified **5 high-potential informational keywords** for blog content (search volume, intent, competition, relevance).
- Researched meta keywords for important pages, selected on SEO relevance, search behaviour and ranking opportunity.

PageSpeed work — mobile

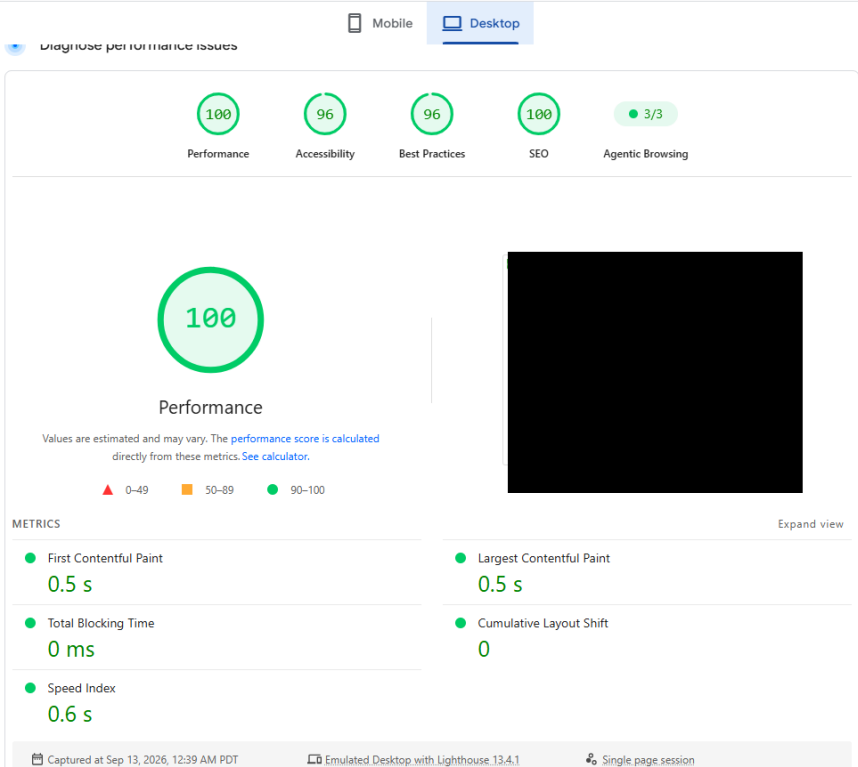

PageSpeed Insights — mobile scores after optimisation (site preview redacted).

Core Web Vitals

Core Web Vitals assessment: passed.

PageSpeed work — desktop

PageSpeed Insights — desktop scores after optimisation (site preview redacted).

Content published

- Published **5 new blog posts**, localised across **7 language markets** (EN, DE, FR, ES, IT, NL, PT).
- All blog URLs submitted to Google Search Console via the URL Inspection tool.
- Translated around **11 blogs into Dutch** for the NL market.

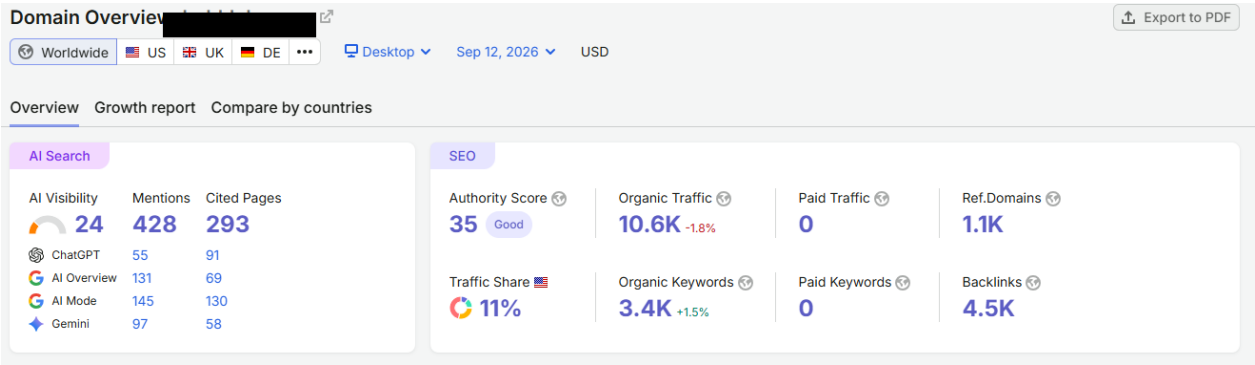

Blog posts published this month

- 5 new posts on informational, parent-focused keywords (exact titles withheld to protect client privacy).
